PROFILE

As a web designer with 4 years of experience, I have a proven track record of creating engaging, user-friendly websites that meet the needs of clients and users. My key skills include HTML, CSS, and responsive design, and I am proficient in using design software such as Photoshop, Illustrator, Adobe XD and Figma. I have also experience in user research and user testing for better experience of the digital product and I am committed to staying up-to-date on the latest trends and techniques in the industry. In my previous employment, I was responsible for designing and developing several successful websites, and I am confident that my skills and experience make me an excellent candidate for any web design position.

SUMMARY

- Proficient in HTML5, CSS3, Responsive design and Media Query

- Knowledge of GIT

- Experienced in creating prototypes, wireframes and mockups

- Have excellent time management and communication skills

PROFESSIONAL EXPERIENCE

01/2016 — 11/2020
Kathmandu, Nepal

Web Designer
Braindigit IT Solution
- Collaborated with clients and product managers to understand their needs and design goals, gathering requirements from the project manager, users, and the market.
- Conducted user research to improve the quality of the product and create user journeys, information architecture, user flows, and screen flows of products.
- Created low/high fidelity wireframes, prototypes, and final designs using design software such as Figma and Adobe Photoshop & Illustrator, ensuring that the designs were visually appealing and user-friendly.
- Designed solutions that met both business requirements and user needs, checking the accessibility of designs.

- Enhancing the UX/UI of old projects while approaching new solutions to tackle problems.
- Used HTML and CSS to convert designs into responsive pages, optimizing applications for maximum speed and scalability.
- Managed multiple projects simultaneously, estimating and planning projects, meeting deadlines, and staying within budget.
- Collaborated with developers to ensure that the final product matched the design and functioned properly, supervising and training interns as needed.
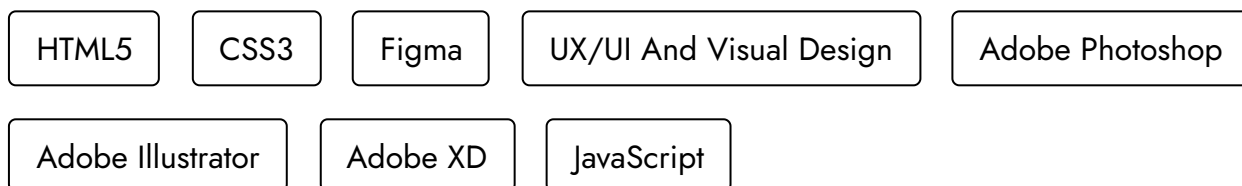

10/2019 — 10/2020 United States	**Freelancer UI/UX Desginer** *Hamro Nepal*

- Conducted user research to create user journeys, information architecture, and user flows that aligned with both users' needs and business goals
- Produced low/high fidelity wireframes and prototypes to visually communicate design concepts and solutions to stakeholders
- Designed effective solutions that met both business requirements and user needs, while also ensuring that the visual design was consistent with branding and marketing goals
- Checked the accessibility of a design, ensuring that it met accessibility guidelines and was usable by all users
- Developed front-end code using semantic markup, CSS, and SASS preprocessor, and used BEM for better project management
- Optimized application performance for maximum speed and scalability, ensuring that the final product was high-performing and met project requirements.
